Summary

- Hands-on experience in Java application development and SDET automation using Spring Boot, React, Selenium, Playwright, Rest Assured, JUnit, and Cucumber. Skilled in developing RESTful APIs, building responsive web applications, creating UI and API automation tests, and using Git and Agile methodologies to deliver quality software.

Education

- Bachelor of Technology in Information Technology

Technical Expertise

- **Programming Languages:** Java, TypeScript, JavaScript
- **Test Automation:** Playwright, Selenium WebDriver
- **Backend Technologies**: Spring Boot, REST APIs
- **Database:** MySQL, MongoDB
- **API Testing:** Postman, REST Assured
- Tools & Technologies: Git, GitHub Actions, Wire mock, Allure

Certifications

- **Your certifications**

Professional Experience

- Gained hands-on experience in software development by working on real-time projects and understanding end-to-end application workflows.
- Developed, tested, and debugged Java applications while adhering to coding standards, best practices, and Git-based version control.
- Developing Spring Boot backend applications, including building RESTful APIs, handling business logic, and managing data persistence using MySQL.
- Designing and developing React-based user interfaces and implementing seamless frontend–backend integration with Spring Boot services.
- Developed automated UI and API test suites using Selenium, Playwright, Rest Assured, JUnit, and Cucumber to ensure application quality and reliability.
- Collaborating with mentors and team members in an Agile development environment to deliver scalable and maintainable software solutions.

Project Details

- **Loan Management System**
  (Spring Boot, React, MongoDB

  Developed a full-stack Loan Management System using Spring Boot, React, and MongoDB to manage loan applications, KYC verification, disbursement, and repayment workflows. Implemented secure REST APIs, role-based access control, and loan status tracking dashboards for branch managers and administrators.
